Installing Opera and configuring for CRM

|	
Go to download website and click on *Opera 11.11 Install Package*	www.autoviewhelp.com/downloads.html
Click Run when prompted	
Click Run again	
Click Options	

Uncheck *Use Opera as my default browser*
Then click *Accept and Install*

Opera will then begin installing

Click the Menu, then select *Settings > Preferences*

Or use the keyboard shortcut Ctrl + F12

On the General Tab
- Change Startup to *Start with home page*
- Home page to your server IP address with **:8080/autoView** at the end (note capital V)
- Change Pop-Ups to *Open all pop-ups*

Click the Advanced Tab, then select Programs from the left panel

Uncheck the box *Check is Opera is default browser on startup*

Do not click OK

If you do, just go back to the Menu and click Settings > Preferences
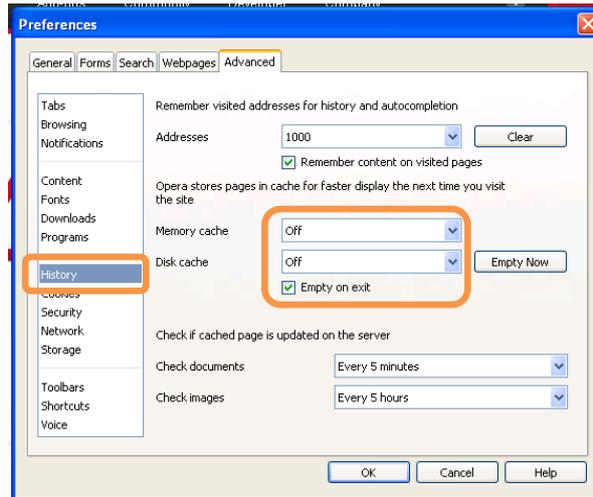

Select History on the left panel

Set Memory cache to *Off*

Set Disk cache to *Off*
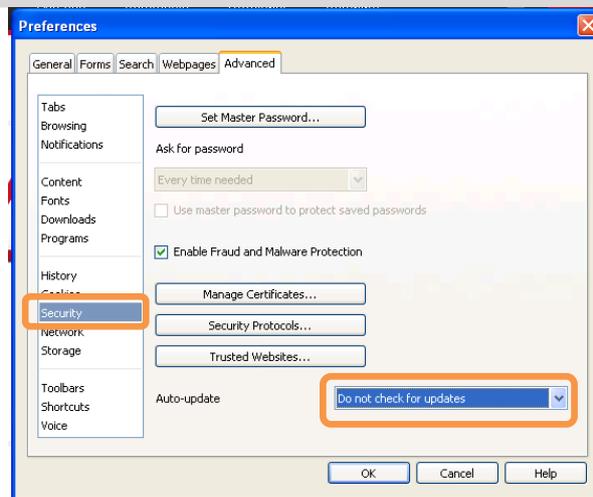

Check *Empty on exit*

Do not click OK

If you do, just go back to the Menu and click Settings > Preferences
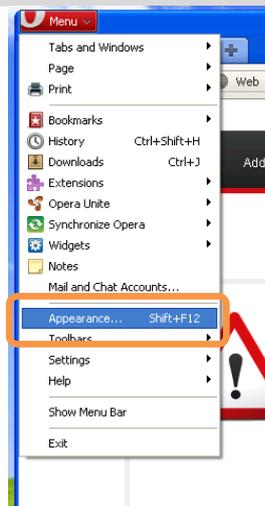

Select Security on the left panel

Set Auto update to *Do not check for updates*

Click Ok
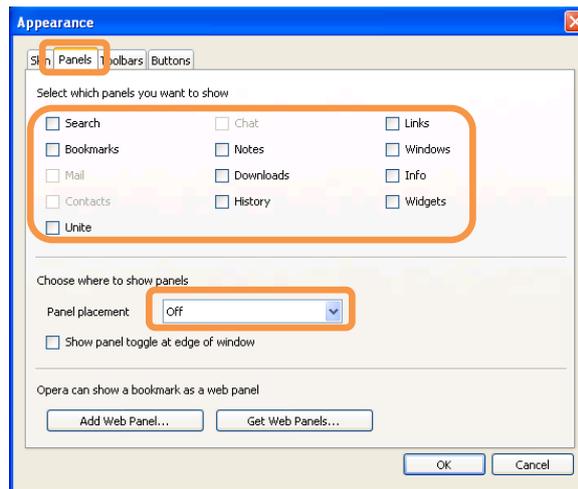

Click Menu, then *Appearance*

Click the Panels Tab

Uncheck all boxes

Set Panel placement to Off

Do not click OK

If you do, just go back to the Menu and click *Appearance*

Click the Toolbars tab

Uncheck all boxes

Set Progress Bar to Off

Click OK, then close the program (X, top right)

Rename the Opera icon on desktop to CRM

Then double click the icon to launch

The following screen should appear

Configuration is now complete
